BOARD CERTIFIED

Dear Colleagues,

I have been using the Exilis device for skin tightening and body contouring for three months. We have had good results with no complications.

The device is easy to use and can be performed by my assistants, technicians, and aestheticians without my physical presence.

I have seen significant skin tightening in all areas and reduction in dimensions in the abdomen, thighs, and arms. The patients are uniformly pleased with the results. Many are scheduling additional areas to be treated.

My assistants are busy performing this procedure without any external marketing. Patients become aware of it "in house" and have referred friends. The Exilis is far superior to the previous radiofrequency device we used.

Mona Greene and her staff provide excellent teaching and support. They are always available for assistance.

If you have any questions please feel free to contact me.

Sincerely,

Martin Fox, M.D.
