Simone Parenti  
Mattioli Engineering

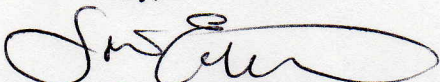

Dear Mr. Parenti:

I am pleased to have the opportunity to obtain and be among the first US users of the Ultrapeel and Transderm Ionoto combined units. As you know I've had the traditional Mattioli Ultrapeel microderm unit for several years and it has been one of the most reliable devices in our busy practice. It's been used for multiple patients on a daily basis for several years now, with virtually no down time.

The addition of the Ionoto device is a great plus. We now have the ability for transdermal delivery of various products. We are now investigating the ability to deliver enhanced local anesthesia through transdermal delivery of lidocaine. We are testing various concentrations and vehicles. Microdermabrasion greatly enhances the drug penetration and the combination is a plus.

I will keep you appraised of the progress of our investigations.

Sincerely,

Sorin Eremia, M.D.
